## SKIRESORT: BAD KLEINKIRCHHEIM

### CARINTHIA - AUSTRIA

### BAD KLEINKIRCHHEIM (BKK) AT A GLANCE

This resort in the heart of Carinthia offers a wide range of winter activities: skiing, snowboarding, cross-country skiing, tobogganing, winter hiking, snowshoeing and ice skating. Winters in BKK and the Nockberge Mountains are diverse and deliver a true alpine atmosphere. Unlike many purpose-built resorts, the village is lively year-round, with 1,726 residents creating an authentic community feel.

Whether relaxed or adventurous, BKK caters to all levels and is the home of Austria's 1976 Olympic downhill champion Franz Klammer. The official World Cup slope "Carinthia – Franz Klammer" promises an exhilarating ride from top to bottom – not for the faint-hearted.

Beyond this legendary run, kilometres of rolling red pistes are perfectly integrated into the gentle, snow-covered Nockberge landscape. Around 300 hectares of skiable terrain await, with 97% covered by snow-making facilities. The surrounding biosphere park also offers scenic winter tours and breathtaking panoramas. Traditional mountain lodges invite guests to warm up by the fireplace and enjoy Carinthian specialties.

Two thermal spas, Römerbad and St. Kathrein, add a unique highlight: after an active day on the slopes, relaxing in soothing thermal waters with mountain views is an experience of its own.

## SKIRESORT: NASSFELD

### CARINTHIA - AUSTRIA

### NASSFELD AT A GLANCE

This resort located along the main Carnic Mountain ridge forms the border between Carinthia and Italy and offers the possibility to enjoy a heli-ski trip in the Carnic mountains.

This is unique as helicopter skiing is generally prohibited in Austria. Due to its special microclimate, the Nassfeld (Passo di Pramollo) pass receives its precipitation from two directions – North and South, plus it averages a whopping 850 hours of sunshine per winter season.

The vicinity to neighbouring Italy (the border station sits atop the Nassfeld mountain pass) spoils the guest with an amazing array of Mediterranean

dishes in the mountains. 24 ski huts across the vast area (29 lifts service a total of 110KM of superbly groomed trails) serve traditional Austrian and Italian fare and thus contribute to the special culinary Alpe-Adria experience.

During World War I this area experienced a lot of fierce high alpine combatting – remnants of that period are still visible today.

### EXAMPLE OFFER

## SKIRESORT: HEILIGENBLUT-GROSSGLOCKNER

CARINTHIA - AUSTRIA

### HEILIGENBLUT AT A GLANCE

This resort located in the North West of Carinthia is set amidst Austria's oldest and biggest National Park "Hohe Tauern". Nomen est omen – the name of this region says it all: more than 40 peaks standing 9800ft tall surround the quaint village of Heiligenblut. Eye to eye with Austria's tallest mountain Grossglockner, skiing this resort is not just a test of your legs, but also a feast for your eyes.

At an elevation of 4260ft, the village of Heiligenblut has a much higher elevation than many other famous Austrian winter resorts. And what's more, 960 inhabitants live here year-round and create an alive village atmosphere, which is what many purpose-built winter resorts lack.

Be it leisurely and relaxed or active and challenging, Heiligenblut is home to the Southern access portal of the world famous Grossglockner High Alpine Road, which – in summer – traverses Austria's highest mountain pass and connects the northern province of Salzburg with the southern province Carinthia.

In winter, you ski across parts of this alpine road as the road cuts through this ski area – covered under several feet of snow. Heiligenblut is primarily famous for its vast off-piste terrain that covers an area of approximately 2000 football fields. All skiable terrain is well above the tree line. ## SKIRESORT: ARLBERG

TYROL - AUSTRIA

### SANKT ANTON AT A GLANCE

Between Tyrol and Vorarlberg lies the Arlberg, a mountain massif like no other and an ideal destination for an exciting Alpine holiday. Its rise as a tourism hotspot began in the late 19th century with the opening of the Arlberg railway tunnel, bringing the first guests to the region.

Today, legendary ski slopes (aka The White Rush) and exceptional off-piste terrain, combined with state-of-the-art lift infrastructure, promise a truly memorable winter experience.

Sankt Anton, on the Tyrolean side, is linked with Lech, Warth and Zürs in Vorarlberg. Together they form Austria's largest interconnected ski area,

offering 305 km of pristine slopes served by 85 modern lifts and around 180 km of off-piste runs. Please note: depending on weather conditions, fresh snow may not fully bond with the underlying layer, forming bumps despite careful preparation – a natural aspect of outdoor skiing.

When it's time to rest, numerous mountain huts and restaurants offer regional specialties alongside breathtaking Alpine views. In the evening, legendary après-ski venues like the Krazy Kanguruh and Mooserwirt await. And for a change of pace, Tyrol's capital Innsbruck is just a short train ride away, offering vibrant cafés, restaurants and shops.
